

Fly Killer Bag

Thank You for Your Purchase.

We appreciate your choice of EntoPest. Please read this guide carefully for proper installation, use, and maintenance of your fly trap.

The EntoPest ProFly Trap Bag is a professional-quality, large hanging fly trap designed for external use. It effectively manages problematic Muscid and Calliphorid flies, including houseflies, bluebottles, and greenbottles. The trap includes a specially formulated, non-toxic attractant that remains effective for up to 12 weeks and can hold up to **20,000 flies**.

Designed for gardens, patios, horse paddocks, farms, and industrial sites, this UV-stabilised heavy-duty bag is built for outdoor durability. The non-escapable turret design allows one-way fly entry, preventing escape.

Package Contents

- 1 x EntoPest ProFly Fly Trap Bag
- 1 x Foil-Sealed Bait Sachet
- 1 x Hanging String
- 1 x Instruction Manual

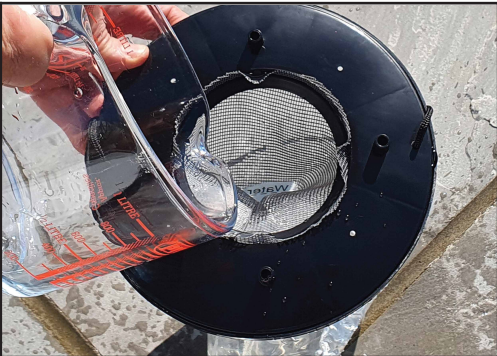

Installation Steps

Step 1: Remove the fly trap bag and bait sachet from the outer packaging.

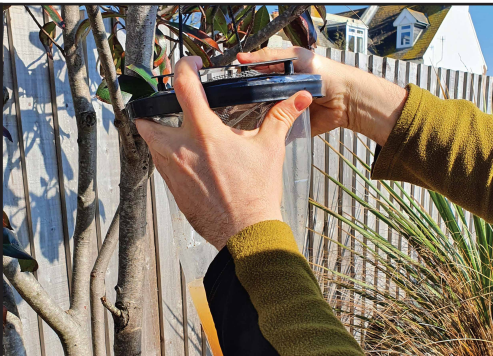

Step 2: Straighten the enclosed trap bag.

Step 3: Add water to trap bag to fill line. Trap bag requires approximately 600ml of water.

Step 4: Add the entire contents of the bait sachet into the trap bag that contains the water.

Step 5: Place the trap in the desired location.

Step 6: Mix formula initially and then weekly gently massaging the trap bag.

Usage & Maintenance

- The trap is designed for outdoor use only.
- Monitor regularly and replace when full or after 12 weeks of use.

More information

- Material Composition: Non-toxic attractant bait.
- Safety Warnings: Keep away from food preparation areas.
- Usage Restrictions: For outdoor use only.

Manufactured in Britain

Both the trap bag and bait sachet are manufactured in the UK.
