

Dear customer,

On behalf of our team, we would like to extend our sincerest gratitude to you for choosing our product. And we are dedicated to providing you with only the highest quality products and exceptional customer service. If you have any inquiries or feedback, please do not hesitate to reach out to us. We are always available and ready to assist you in any way we can.

Working Principle

The fly catcher lures flying insects with a special type of light and captures them on a non-toxic sticky board. This environmentally friendly and effective method avoids the use of harmful chemicals or pesticides. It provides a humane solution for controlling flying insects in indoor spaces.

Product Outlook

Parameter

Product Name:	Electronic Fly trap
Model:	MK12
Material:	ABS+PC
Power Supply:	Plug into the socket
Input Voltage:	AC100-240V, 50/60Hz
Detection Range:	20 m ²
Power consumption	5 w
Dim(mm):	150*70*75(L*W*H)

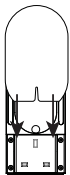

How to Use

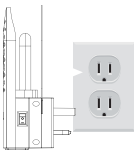

1.Close windows and doors prior to operation.

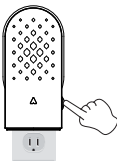

2.Remove the protective film from the adhesive board.

3.Insert the sticky board into the device with the adhesive side facing forward.

4.Connect the device to a power socket.

5.Activate the unit by pressing the ON button.

6. Regularly replace the sticky board when it becomes saturated with insects.

Useful Tips

- Ensure the sticky board is oriented towards the front.
- Regularly inspect the trap; if fly capture is minimal on the sticky board, consider relocating it.
- Maintain usage consistently for 1-2 weeks to 3.maximize effectiveness.
- Optimal fly trapping occurs during the night; position the unit away from other light sources for enhanced results.
- Use the fly trap exclusively indoors, and avoid placing it in damp environments.
- Confirm whether the power supply and adapter are consistent before use.

Warranty

Our products come with a warranty policy. For any questions or concerns, please contact our customer service team for assistance. We are committed to providing prompt and effective support to ensure your satisfaction.
