

Electronic Rat Killer

Dear customer,
Thank you very much for purchasing our products. Please read this product manual carefully before using this product. If you have any questions or suggestions about this product, please contact our customer service team.

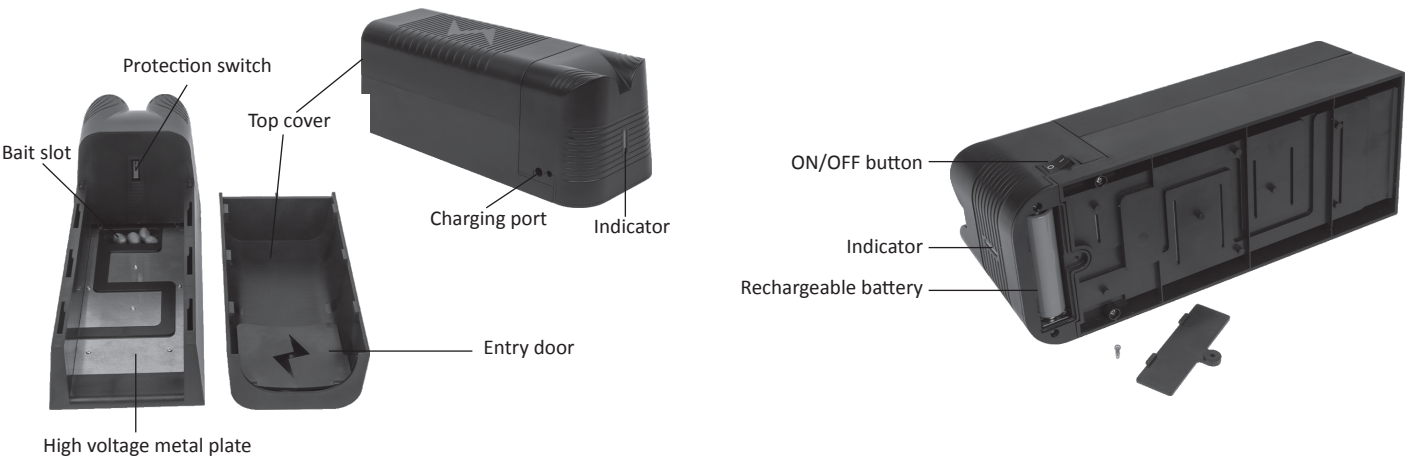

Working Principle

Put the favorite food of rats on a bait slot inside the product. The scent will attract the rat into the product. When the rat touches the metal plate, the high voltage inside will electrocute it. Compared with the traditional cage and trap, the electronic rat killer is more efficient, safe, and hygienic. It does not need to touch the dead animal and kills rats safely.

Model:MK08

Product Outlook

Parameter

Product Name:	Electronic Rat Killer
Product Model:	MK08
Product Material:	ABS+PC
Battery :	3.7V/1800mAh/18650*1
Power Consumption:	3W
Charging Voltage/Current:	5V/700mA
Charging Time:	5-6H
N.Weight:	550g
Dim(mm):	260*100*96.5(L*W*H)
Accessories:	trap*1, user manual*1, power cable*1, LED cable*1

How to Operate

1. Ensure that the power is OFF, and then open the slide cover;
2. Put the bait into the slot. Bait is suggested to put: biscuits, bread, peanuts, ham sausage, and other food that rats like;
3. Cover the slide cover, and press the ON/OFF button, the red light will flash at this time;
4. Put the product near the wall, corner, and other places where mice are active;
5. After the rat is shocked by the electronic rat killer, the two blue lights (on the trap and power line) will flash together, and the product will enter the safe mode;
6. Open the slide cover, throw away the dead rat, then you can use it continually.

Indicator Instructions

1. Red light flash: Standby mode (flash once per 6s)
2. Red indicator light on: High voltage electric shock keep working (180s)
3. Two blue indicators(on the trap and power line) flash separately: Rats were killed (flash once per 5s)
4. Green indicator light on: Products is in charge, and light OFF after fully charged
5. The red indicator and the blue indicator flash alternately: Low power reminder
6. Buzzer alarm: Reminder after the electricity is finished (rings twice of 30 seconds)

Cautions

- Avoid touching the metal plate and the bottom of the machine to prevent accidental electric shock;
- Only for indoor use, DO NOT put outdoors, suitable for warehouse, factory, office, hotel, parking lot, etc;
- DO NOT leave the mousetrap open where children or pets can reach it;
- Wait until the blue light flashes and the buzzer prompts to open the cover when the mouse is shocked;
- When the yellow indicator is on, it indicates that the battery is low and needs to be charged;
- The mouse killer trap support at least 30 times electric shock after fully charged;
- If the place where you put the trap is not convenient to see the indicator, just plug in the power cable with an LED indicator that can remind you to clean up the electrocuted mice in time.

Warranty

Our products come with a warranty policy. For any questions or concerns, please contact our customer service team for assistance. We are committed to providing prompt and effective support to ensure your satisfaction.
